

## **Department of Electronics**

### **Program outcome for general level teaching :**

1. An ability to design ,implement and evaluate Electronics circuits and systems in our everyday life.

2. An ability to apply the fundamental concepts of electronics in embedded systems.

3. An ability among students to understand the concept of Mathematics,Physics and Core Electronics subjects which will facilitate understanding of new technology.

4. Students of Computer Science (Hons.) and Physics (Hons.) having Electronics as their general subject are benefited as some part of their hons. syllabus is same as Electronics general syllabus.

5. In higher learning students of Physics (Hons.) can take Electronics as their special paper.
