

As the Department of Environmental Studies does not offer any General or Honours Course till date, it is difficult to assess outcome. But we hope the following can be considered as the outcome of the ENVS departmental effort so far:

1. The celebration of environment related important days (World Environment Day, Earth Day, World Biodiversity Day etc.) provided awareness among the students of our college and made the students realize the importance of nature in our life.
2. The events allowed the students to enhance their skills by participating and expressing their ideas for reducing the wastes to save our Mother Nature.
3. Generated a sense of responsibility towards society.
4. Successful management of educational tours (Book fair visit and excursion) was provided by the Department of Environmental Studies through assistance to the faculty members of other departments (for example, Geography and Commerce).
