Choose any one of the three project options given below:

1. Checklist of different kinds of trees found in your locality and their importance/role for the environment.
2. Checklist of different kinds of herbs and shrubs found in your locality and their importance/role for the environment.
3. Checklist of local avian species in your surrounding area and their importance/role for the environment.
4. Checklist of common insects and in your surrounding area and their importance/role for the environment.
5. Importance of Sacred Grooves in society.
6. History, cultural variation and association of your local population in relation with your surrounding environment.

GENERAL INSTRUCTION

The students have to submit **the hand-written projects** (maximum **25 pages**) only. Printed version will **not** be accepted. The project should be written on **A4** sheet preferably. If not available, use any white sheet. Every page must be margined properly. **No plastic channel files will be accepted.** Project must be stapled and the stapled pins are to be sealed with sticking tape properly before submission. The project work is expected to be neat and tidy. You may use any coloured pen **except red colour**.

The students are expected to divide the project into **various sections** mentioned below:

1. Cover page with the project title, Student's name, CU roll number and CU registration number, Semester, Department (Hons or General)
2. Contents
3. Introduction
4. Aims and objectives
5. Location of study area
6. Methods of data collection
7. Results & Discussion
8. Conclusion
9. Acknowledgement
10. References

The submitted projects must be concise.
