2018 -23

A compilation of events organised by

New Alipore College

Nature Club

The journey

**“Look deep into nature, and then you will understand
everything better”**

Albert Einstein

From the Conveners.....

**New Alipore college Nature Club came into existence on 20th,
September, 2018.**

The Club strives to promote stewardship of nature and help its members develop the attitude of conservation and be one with 'Nature'.

Club Objectives:

- **Raising awareness:** The Nature Club aims to raise awareness among students about the importance of nature, biodiversity conservation, and sustainable development.
- **Promoting conservation:** The club encourages its members to participate in conservation activities such as tree plantation drives, wildlife conservation programs, and beach clean-up campaigns.
- **Environmental education:** The Nature Club conducts various environmental education programs to impart knowledge about ecological concepts, climate change, and other environmental issues.
- **Community engagement:** The club promotes community engagement by encouraging students to participate in local environmental events and to work with local communities to solve environmental problems.
- **Networking:** The Nature Club provides a platform for students interested in nature and the environment to network with like-minded individuals and organizations.
- **Organizing field trips:** The club organizes field trips to natural reserves, national parks, and wildlife sanctuaries to expose students to the wonders of nature and to learn about conservation efforts.
- **Advocacy:** The club advocates for environmental causes, such as wildlife conservation, climate change, and sustainable development through awareness-raising and lobbying efforts.
- **Sustainability:** The club promotes sustainable practices on campus, such as waste reduction, energy conservation, and water conservation.

Ultimately To have fun and enjoy nature!

on

10th February, 2018

Visit to AGRI-HORTICULTURAL SOCIETY OF INDIA New Alipore College Nature Club Event

Arko Sengupta

II Year Botany (Advance)

We visited to The AGRI-Horticultural Society of India to relish the Annual Flower Show on 10th February, 2018. It was the first event of our Nature Club. The experience of that flower show was asymptotic & fathomless for us. We're just flabbergasted after watching those several kinds of flowers, orchids, vegetables etc. The atmosphere inside the society was very attractive & also an ideal place to visit for NATURE lovers.

We, members of nature club, New Alipore College, foregathered at the main gate of AGRI Horticultural Society of India at 8 am in the morning. We eagerly stepped into the annual flower show & the guidance of our professors helped us very much. We observed several kinds of colorful flowers, different types of colorful orchids & the aerial roots of the orchids. Then we observed several kinds of cactus and bonsai also. One of the attractive parts of that show was the daily life vegetables segment, there was several kinds of fresh vegetables, the sizes of those veggies were terribly huge and fleshy. It seem like we consumed that particular few hours within a fraction of second with full of joy and satisfaction. It was a brilliant experience of ours in the debut of our nature club. We left that beautiful place with lots of memories and knowledge.

Later, a photography competition was organized by our New Alipore College Nature Club on "Flowers of the Annual Flower Show at the AGRI-Horticultural Society of India". Judgment of this competition was done by open voting from the students & faculties inside the auditorium. I was ecstatic to receive the first prize at the competition in the presence of such august gathering.

Our New Alipore College Nature Club has just set off on a new journey and this initiative of New Alipore College is invaluable.

Our "Moto" is to keep our nature safe and clean.

The journey begins.....

|| Reduce, Reuse & Recycle ||

A seminar on '**Plastic Pollution**'

Organised by

NEW ALIPORE COLLEGE NATURE CLUB

June 5, 2018

Plastic pollution has become an epidemic. The growing rate of plastic pollution is even worsened due to the rising consumption and population growth. Plastic pollution has increasingly becoming a major nuisance and poses significant threats to the entire environment leading to land, air, and water pollution. From poisoning and injuring marine life to disrupting human hormones, from littering our beaches and landscapes to clogging our waste streams and landfills, the exponential growth of plastics is now threatening the survival of our planet.

India has been chosen as the global host of the World Environment Day, that will focus on galvanising greater action against single-use plastic pollution on June 5 this year, by the United Nations Environment Programme (UNEP, now also known as UN Environment). After demonstrating global leadership on climate change, India will lead the charge on 'Beat plastic pollution', the theme for World Environment 2018.

For the good of the planet, it's time to rethink how we use plastic.

Together we can tackle this global crisis!

But we have to walk the talk and more awareness campaigns are required to sustain the momentum.

Painting Competition : “Mother Nature”

On

5th June, 2019

A painting Competition was held to celebrate World Environment Day on 5th June, 2019 to highlight the importance of nature for our livelihood. The following painting was judged the best by our panelists.

‘PLANT A TREE & SAVE A LIFE’

Organised by

NATURE CLUB, NEW ALIPORE COLLEGE

6th September, 2019

Plants provide an invisible bond between the past, present and future. The forest cover worldwide is decreasing at an alarming rate. The only way we can save this exponential decrease of flora in the environment is by consciously acting towards its conservation.

As part of nature conservation programme ‘Plant a Tree & Save a Life’ organised by Nature Club, New Alipore College we invited Prof. Alessandro Vescovi from University of Milan to plant a seedling of *Nyctanthes arbor-tristis* commonly known as Shiuli in Bengal in our college garden. A green crusader himself, Prof. Vescovi graciously agreed to our request and planted a seedling of Shiuli (picture of plant given below) on 6th September, 2019 in our garden.

We are immensely grateful to such eminent personality for being a part of the initiative effort initiated by Nature Club, New Alipore College for conserving nature which we all hope is a small step towards a larger vision.

Prof. Vescovi also extended his best wishes and expressed interest in our endeavour (s).

We are indebted to him for his participation in this ‘Plant a Tree & Save a Life’ crusade of Nature Club, New Alipore College. We look forward to further collaboration with Prof. Vescovi in the future.

It is a great honour for me to be part of this project. Meeting the college students has been a pleasure. I always derive pleasure and enlightenment from interactions with young scholars.

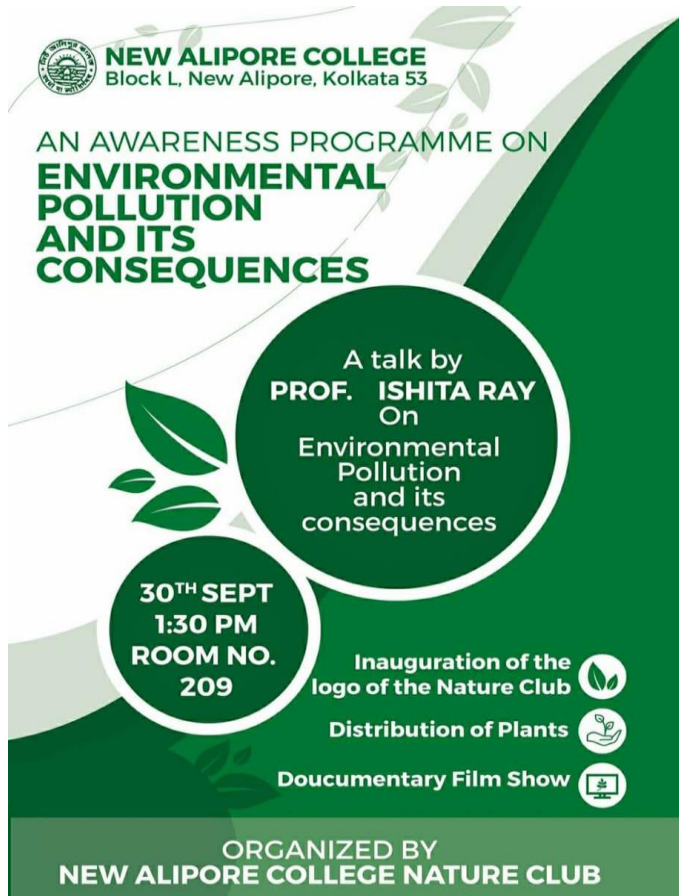

Alessandro Vescovi

Seminar on “ Environmental Pollution and its Consequences ”

On

30th September, 2019

A very informative and enlightening talk was delivered by Prof. Ishita Ray of ENVS department, New Alipore college. On the same day, the logo for the Nature club designed by Dr. Aniruddha Kar was inaugurated and a Documentary Film Show was held to commemorate the occasion. Further, saplings were distributed to the departments by the conveners, Prof. Debarati Das and Prof. Pooja Rai along with student volunteers.

On

19th June 2021

A painting Competition was held to celebrate to highlight the importance of nature for our livelihood. The following painting was judged the best by our panelists.

Distribution of plants to Guests and all the Departments

On

5th August, 2022

On the occasion of College Foundation Day, NAC Nature club distributed plants to the guests and all the departments of the college.

“Can you add your signature?”

A worldwide online petition was created by NAC Nature Club to raise awareness on “Air Pollution” on 7th September, 2022

Air Pollution Awareness Campaign

DO YOU KNOW?

- Air Pollution is now the world's largest environmental health risk.
- Air Pollution is a mixture of solid particles and gasses into the air.
- It occurs when the earth contains harmful amounts of gasses such as CO2 and methane, dust, fumes and odour.

DO YOU KNOW?

Air Pollution is consistently aiding climate change.

Though both incidences seem different, they are closely interlinked. By reducing air pollution we also protect the climate.

INTERNATIONAL DAY OF CLEAN AIR FOR BLUE SKIES

7TH SEPTEMBER

United Nations has marked this day as the first International Day of Clean Air for blue skies. We need dramatic and systemic change to fight our common enemy 'air pollution'.

International Day of Clean Air for blue skies 2022 - UNEP

Small actions make a **big** difference to the air we breathe.

NEW ALIPORE COLLEGE NATURE CLUB

On November 26, 2019, the Second Committee of the 74th session of the United Nations (UN) General Assembly adopted a resolution designating **7 September** as the "International Day of Clean Air for blue skies".

CLEAN AIR IS IMPORTANT FOR

HEALTH **PRODUCTIVITY** **ECONOMY** **ENVIRONMENT**

It's especially important for children because they want to be healthy for the life ahead of them.

If they're healthy when they're a kid they're more likely to have a better life when they're older.

A Humanitarian Approach!

Organ Donation:
Life Goes On.

When I'm gone and no longer around
When you've buried my body deep in
the ground
I hope you've listened to what I have
said
My organs are really no use when I'm
dead.

Take them all out
Share them around,
Shout from the rooftops
A donor we've found!
My liver, my kidneys my lungs and my
heart
Just a few things to give someone a
start

Awareness campaign on Organ Donation Day
by NAC Nature Club

News from Nature.....

New Alipore College

Nature Club

The COVID-19 pandemic not only has caused a global health crisis but also has significant environmental consequences. Although many studies are confirming the short-term improvements in air quality in several countries across the world, the long-term negative consequences outweigh all the claimed positive impacts.

This change has been massive.....

Adapted immobilization !!
